Dottorato di ricerca in fisica – Ciclo XXIV

PhD thesis

STUDY OF THE ${}^{6,7}\text{Li}+{}^{64}\text{Zn}$ COLLISIONS AROUND THE COULOMB BARRIER

Tesi di:
Emanuele Strano

Tutor:
PROF. Marcello Lattuada

Title	page
INTRODUCTION.....	iii
CHAPTER 1.....	1
1. Physical problem description.....	1
1.1 The fusion process above the Coulomb barrier.....	1
1.1.1 Region 1.....	2
1.1.2 Region 2 and 3.....	4
1.2 The fusion process below the Coulomb barrier and Channel Coupling.....	6
1.3 General description of weakly bound nuclei: halo and cluster structures.....	8
1.4 The fusion process in collisions involving weakly bound nuclei.....	9
1.5 Experimental techniques for measuring fusion cross-sections.....	11
1.5.1 Fusion cross-section measurements by direct methods.....	12
1.5.2 Fusion cross-section measurements by indirect methods.....	13
1.6 Fusion involving weakly bound nuclei: some experimental results.....	15
1.6.1 Collisions involving weakly bound nuclei and heavy mass targets.....	15
1.6.2 Collisions involving weakly bound nuclei and medium mass targets.....	18
1.6.3 Collisions involving weakly bound nuclei and light mass targets.....	19
1.6.4 Collisions involving halo nuclei.....	22
1.7 The “universal fusion function”.....	23
1.8 Threshold Anomaly and weakly bound nuclei.....	26
1.9 Motivations and goals of this work within the discussed topic.....	30
1.9.1 Fusion excitation functions for the ${}^{6,7}\text{Li}+{}^{64}\text{Zn}$ systems.....	30
1.9.2 Threshold Anomaly for the ${}^{6,7}\text{Li}+{}^{64}\text{Zn}$ systems.....	33
CHAPTER 2.....	38
2. Elastic scattering.....	38
2.1 Experimental setup.....	38
2.2 Extraction of the elastic scattering angular distributions.....	42
2.3 Optical model fits and results.....	44
2.4 Conclusions.....	49
CHAPTER 3.....	50
3. Fusion cross-section measurement.....	50
3.1 Activation: experimental setup.....	50
3.2 Activity measurement: experimental setup.....	56
3.3 Si-Li drifted detectors geometric efficiency.....	61
CHAPTER 4.....	68
4. Data analysis for fusion cross-section extraction.....	68
4.1 X-ray spectra.....	68
4.2 Activity.....	72
4.3 Feeding and activity fit.....	74
4.4 Beam current profile.....	77
4.5 Production cross-section.....	78
4.6 Statistical model calculations.....	80
4.6.1 Statistical model.....	80
4.6.2 Comparison of data with statistical model code results.....	82
4.7 Total fusion and total reaction cross-sections.....	87
REFERENCES.....	90
